

Environmental, Health & Safety Policy

Western Diversified Plastics is committed to providing a workplace that strives for, and achieves, high standards of safety, workplace health, and environmental conformance. In order to support these goals:

- We are committed to preventing accidents and protecting the health and safety of our employees, contractors, customers and our community.
- We will protect the environment and use natural resources responsibly, by conserving energy, preventing pollution, and minimizing waste to landfill through recycling efforts.
- We assess aspects and impacts of our activities carefully and take into consideration human health, safety, and the environment we affect.
- We continually improve our Environmental, Health & Safety performance through the periodic review of key objectives and targets.
- We comply with applicable environmental, health and safety laws, regulations and other requirements as they relate to our operations.
